

Easy and economical zirconia cementation

ZirCAD®
Cement

Resin-modified glass ionomer cement
for zirconia restorations

ZirCAD[®] Cement is a new high-performance resin-modified glass ionomer cement

ZirCAD Cement allows you to deliver predictable cementation results case after case with its easy handling and quick clean-up.

Easy

- ✓ Quick and easy clean-up in the gel phase, can be sped up with the optional tack cure
- ✓ Material easily flows out of the cementation gap and stops at the margin
- ✓ The simplest way to cement zirconia and metal-based restorations

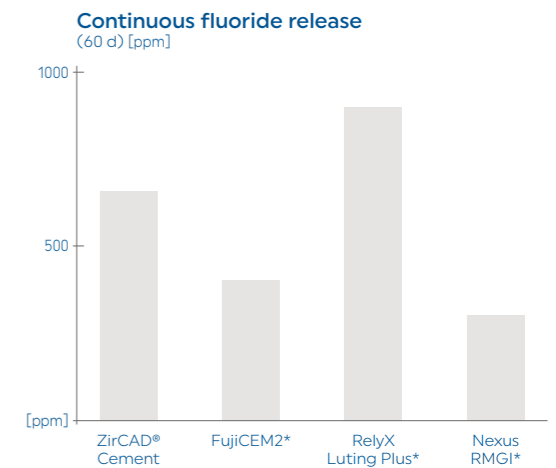

Quick and easy clean-up in the gel phase

Reliable

- ✓ Fluoride release
- ✓ Moisture and acid resistant
- ✓ Low film thickness for a marginal fit

Continuous fluoride release formulation
ZirCAD Cement offers continuous high fluoride release, allowing for better longevity and more peace of mind once the restoration is cemented in place.

Economical

- ✓ Single product cement without primer or conditioner
- ✓ Tack curing allows the removal of excess material without any waiting time
- ✓ Cost-efficient cementation from the premium brand you trust: Ivoclar Vivadent

Workflow

1

Isolate
Isolate quickly
with OptraGate®

2

Place
Good handling
makes cementation
a straightforward process

3

Polish
OptraGloss® allows the cement
margin to be polished in one
step and zirconia to be
polished in two steps, without
the need for polishing paste.
